

RAJAN VISHWAKARMA

Senior DevOps & Cloud Engineer | AWS | Kubernetes | Terraform | GitLab CI/CD | 7+ Years

Noida, India | +91 9792472248 | rajanoption@gmail.com | linkedin.com/in/rajan1997 | github.com/diamondrajan1996

PROFESSIONAL SUMMARY

Results-driven DevOps and Cloud Engineer with 7+ years of experience designing, automating, and operating enterprise cloud infrastructure across AWS and Azure. Strong expertise in Kubernetes, Terraform, GitLab CI/CD, Jenkins, OpenSearch, Linux, Python, Bash, cloud security, observability, and workload migration. Designed an Amazon OpenSearch solution for centralized analysis of 3+ million CloudWatch log events, implemented SAML-based SSO and RBAC integrations, and automated management of 100+ user accounts. Experienced in building secure DevSecOps pipelines, infrastructure automation, backup and recovery workflows, and reliable cloud-native platforms.

CORE COMPETENCIES

Cloud - AWS	EC2, EKS, ECS, S3, RDS, Lambda, VPC, IAM, ELB, Auto Scaling, Route 53, CloudWatch, CloudTrail, OpenSearch, Security Hub, AWS Backup, Application Migration Service
Cloud - Azure	Azure Virtual Machines, AKS, VNet, Blob Storage, Load Balancer, Key Vault
CI/CD	GitLab CI/CD, Jenkins, GitHub Actions, Bitbucket, Argo CD, AWS CodePipeline
Containers	Docker, Kubernetes, Amazon EKS, Azure AKS, Docker Swarm, Helm
Infrastructure as Code	Terraform, AWS CloudFormation, Ansible, Vagrant
Security / DevSecOps	SAML SSO, RBAC, IAM, SAST, DAST, dependency scanning, container scanning, Security Hub, CloudTrail
Monitoring	Amazon CloudWatch, OpenSearch, ELK Stack, Grafana, Prometheus, Nagios, Zabbix
Automation / OS	Python, Bash, Shell scripting, Linux, Red Hat, Ubuntu
Databases	MySQL, PostgreSQL, MongoDB, DynamoDB, Microsoft SQL Server
Methods	Cloud migration, backup and recovery, microservices, Agile collaboration

PROFESSIONAL EXPERIENCE

Senior Associate Infrastructure L1 | Publicis Sapient

Goldman Sachs (AWM) - InvestOne | Apr 2025 - Aug 2026 | AWS Infrastructure & Linux

- Collaborated across AWS, TypeScript, and Linux-based environments to design, automate, and maintain enterprise cloud infrastructure.
- Designed and implemented Amazon OpenSearch Service for centralized monitoring and analysis of 3+ million CloudWatch log events, strengthening observability and troubleshooting.
- Implemented SAML-based Single Sign-On and Role-Based Access Control integrations to improve access governance and security.
- Developed Python automation to manage 100+ user accounts and profiles, generate operational reports, and distribute them through enterprise FTP workflows.
- Built and maintained a Bash-based Managed Notification System with access-controlled workflows and automated email delivery to business and technical stakeholders.

Cloud Architect | Precognitas Health Private Limited

Caliper Product | Feb 2023 - Apr 2025 | Cloud Operations, Security & Automation

- Established GitLab CI/CD pipelines and integrated static analysis, DAST, dependency scanning, and container scanning into delivery workflows.
- Integrated Terraform with GitLab pipelines to provision and manage serverless cloud infrastructure.
- Automated backup and restore workflows using AWS snapshots, backup services, and disaster recovery practices.
- Managed AWS services including EC2, VPC, EBS, ELB, CloudWatch, CloudTrail, Security Hub, VPN, and IAM.
- Built operational automation using Python and Bash and monitored platform health with CloudWatch and Grafana.
- Collaborated with development, security, QA, and business stakeholders to support successful product delivery.

DevOps Engineer | Walking Tree Technologies Pvt. Ltd.

FracPro OPS | Jun 2021 - Feb 2023 | Java Microservices & DevOps

- Designed and maintained CI/CD pipelines using GitHub, Bitbucket, Jenkins, and AWS for automated build, test, promotion, and deployment workflows.
- Administered Kubernetes clusters and automated deployment, scaling, monitoring, and lifecycle operations for containerized microservices.
- Led migration of on-premises virtual machines and enterprise applications to AWS and Azure.

- Created Python and Bash scripts for build, deployment, monitoring, maintenance, and operational automation.
- Built Docker-based environments and used Terraform and Helm for repeatable resource provisioning and application deployment.

PROFESSIONAL EXPERIENCE - CONTINUED

DevOps Engineer | BKC Weathersys Pvt. Ltd.

Weather Forecasting Platform | Mar 2020 - Jun 2021 | AWS, Linux & Jenkins

- Deployed and managed AWS infrastructure including EC2, RDS, S3, and supporting platform services.
- Designed, implemented, and maintained Jenkins CI/CD pipelines, jobs, plugins, and integrations.
- Collaborated with development teams to improve build, testing, and deployment workflows.
- Migrated on-premises servers to AWS using AWS Application Migration Service.
- Supported a LAMP, Python, Bash, Jenkins, AWS, and MySQL technology stack.

Linux System Administrator | Navigant Technologies Pvt. Ltd.

Apr 2019 - Mar 2020 | Linux Operations & Monitoring

- Monitored system performance, resource utilization, and platform health using Nagios, Zabbix, and Prometheus.
- Supported routine Linux system administration and operational maintenance activities.

SELECTED TECHNICAL ACHIEVEMENTS

- Designed centralized log analytics with Amazon OpenSearch for 3+ million CloudWatch log events.
- Automated lifecycle management and reporting for 100+ user accounts using Python.
- Implemented enterprise authentication and authorization using SAML SSO and RBAC.
- Embedded SAST, DAST, dependency, and container scanning within GitLab CI/CD pipelines.
- Led workload migration initiatives from on-premises infrastructure to AWS and Azure.
- Automated infrastructure, deployment, backup, notification, and operational workflows with Terraform, Python, and Bash.

KEY PROJECTS

- InvestOne - Goldman Sachs AWM: Enterprise AWS infrastructure, OpenSearch-based CloudWatch log analytics, SAML SSO, RBAC, Python user-management automation, and Bash notification workflows.
- Caliper: AI-enabled value-based-care risk analytics platform supported through AWS infrastructure, GitLab DevSecOps, Terraform, backup and recovery automation, CloudWatch, and Grafana.
- FracPro OPS: Cloud-native operations platform supported with Kubernetes, Docker, Jenkins, AWS, Terraform, Helm, Python, Bash, and on-premises-to-cloud migration.
- Weather Forecasting Platform: AWS infrastructure and Jenkins delivery automation for a LAMP, Python, Bash, and MySQL-based meteorological solution.

EDUCATION & CERTIFICATION

Advanced Diploma in Software Development	NIELIT, Gorakhpur 2018
Bachelor of Computer Applications - Computer Science	Deen Dayal Upadhyay University, Gorakhpur 2017
Red Hat Certified Engineer (RHCE)	2018
